

Primary Benefits

- Standardized and automated processes for any security use case
- Ability to adapt to any alert with security-focused case management
- SecOps efficiency boosted with real-time collaboration
- Ability to take action on threat intelligence with speed and confidence

Capability Overview

- Endpoint threat prevention
- Endpoint detection and response
- Endpoint security controls (device control, host firewall, disk encryption)
- Network detection and response
- Managed threat hunting

Differentiators

- 90% faster response times
- 95% reduction in alerts requiring human review
- Largest SOAR ecosystem with 400+ partner integrations
- The industry's only extended SOAR platform with native threat intelligence management

Use Cases

- Security orchestration and automation
- Case management
- Threat intelligence management
