

HPE GreenLake

Single hybrid operating model and experience everywhere

After an initial cloud-first push to move as many workloads as possible to the public cloud, many enterprises have become hybrid by accident — a mix of workloads running at the edge, in data centers, colocations, and public clouds.

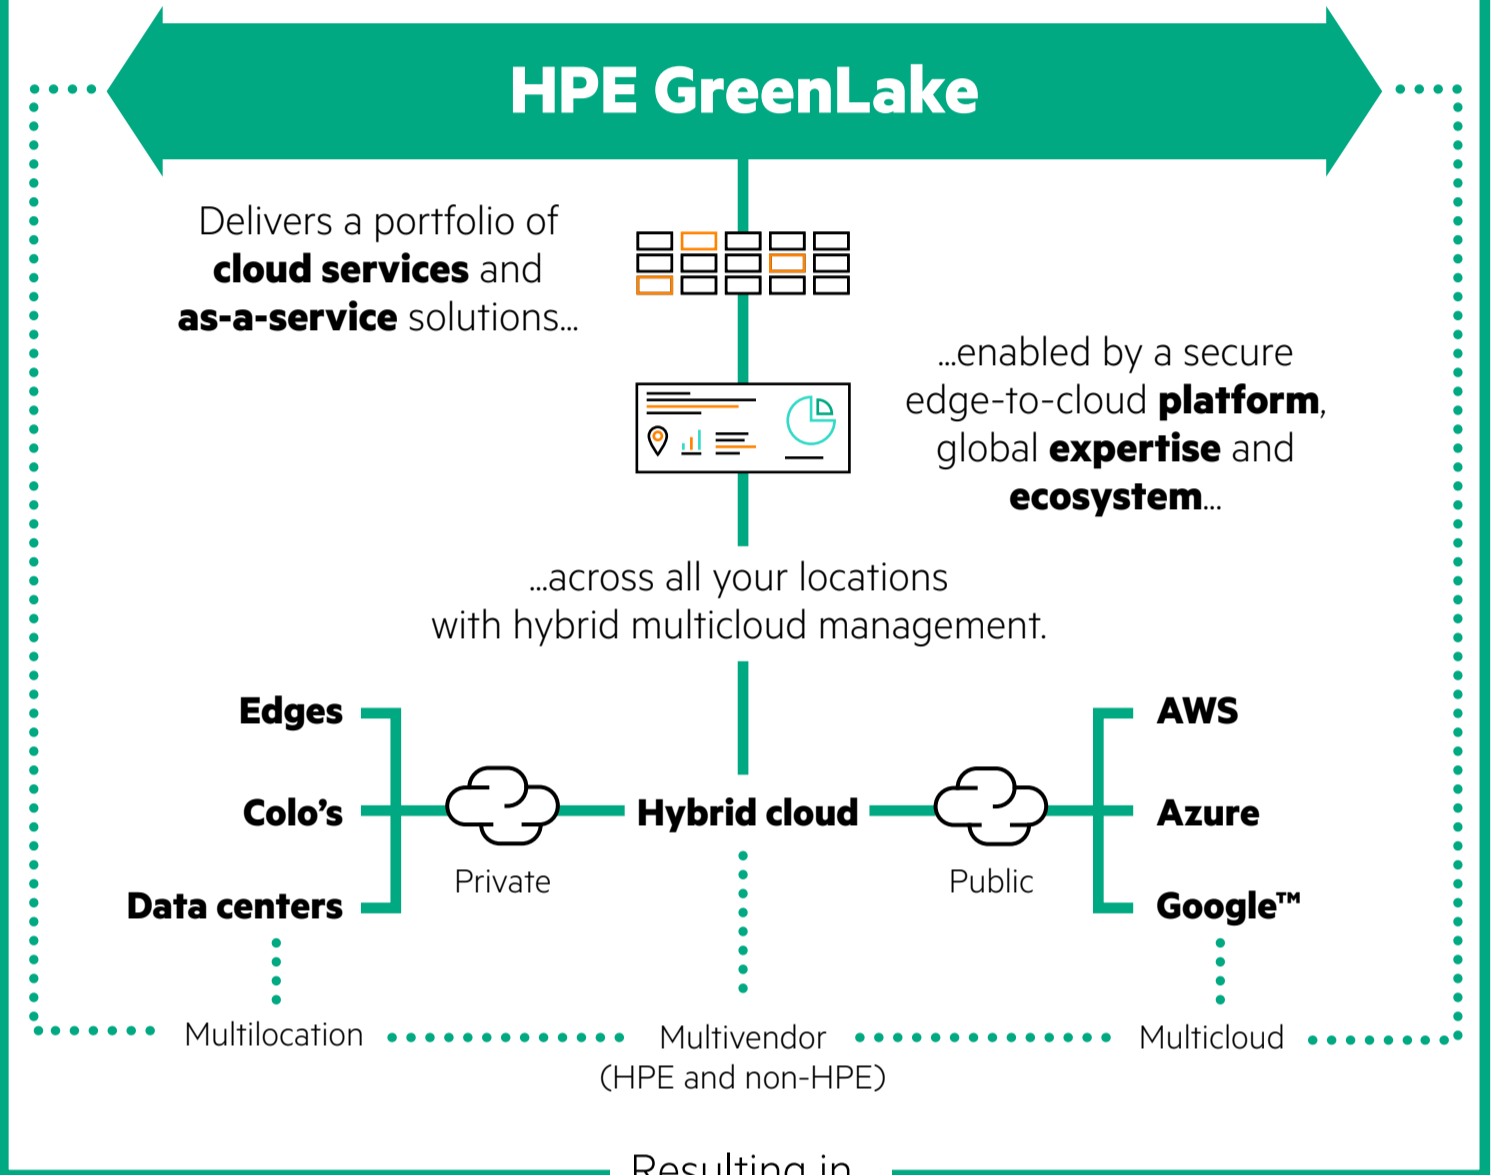

Multigen IT | Data sovereignty | Security & compliance | Data costs & control | Latency

Hybrid by design should deliver

- Cloud experience everywhere
- Agility & flexibility
- Visibility & control
- Simplified & automated

Complete your cloud strategy with the cloud that comes to you

Resulting in...

<p>Cloud experience</p> <p>To all your apps and data and modernization of your multigenerational IT</p>	<p>Flexibility</p> <p>To place your workloads with your choice of location and management model</p>	<p>Control</p> <p>With visibility of your data, cost, energy efficiency, security, and compliance</p>	<p>Simplification</p> <p>Of multivendor, multicloud IT & Ops management through automation and AI</p>
----------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------	--------------------------------------------------------------------------------------------------------------	------------------------------------------------------------------------------------------------------------------

- 2x** faster DevOps cycles²
- 80%** shorter time to deploy IT projects³
- 45%** reduced TCO for infrastructure⁴
- 65%** operational savings⁵

Our extensive HPE GreenLake portfolio is offered through

<p>Private and hybrid cloud</p> <p>Cloud-native IaaS and SaaS</p>	<ul style="list-style-type: none"> Multivendor IT Ops management VMs, Containers, developer tools Hybrid, multicloud orchestration Block and file storage Hybrid data platform Network as a service AI/ML Backup and recovery Ransomware protection 	<ul style="list-style-type: none"> SAP® as a service Database as a service Desktops as a service Industry vertical applications Electronic Health Records Digital Twin Payments And many more Storage and data protection Cohesity, Commvault, Veeam, Cloudian, Qumulo 	<p>Flex solutions</p> <p>Outcomes as a service</p>

For the most demanding use cases

Edge

Low latency
Edge AI, analytics
Edge computing & connectivity

Hybrid cloud

Price/performance predictability
Steady state production workloads
Multigen IT & integration

Data and AI

Critical, compute-intensive apps
Sovereign AI & data
Security, risk, & compliance needs

Let us meet you anywhere along your hybrid cloud journey with the single operating model and experience everywhere

Start anywhere

Explore with an interactive demo experience, hosted trial or test drive, or engage with our experts for an advisory session and get started on your hybrid cloud journey
